

"YOUR MOBILITY MADE EASY!"

"OT NEWS YOU CAN USE" ...

RASCAL WEGO POWERCHAIR

Pushing a manual wheelchair can be tiring. Let the innovative WeGo Powerbase take the strain leaving you able to enjoy days out with a loved one. Powered by its battery pack the WeGo puts you in control – the delta style handlebars allow you to manoeuvre with ease. No more aching arms or back, just let the WeGo take over, so both you and your passenger enjoy a great day out together.

Easy to dismantle, the WeGo will fit in most car boots. If you're a regular shopper why not leave the WeGo in the boot and just bring the battery pack inside for an overnight charge? Then you are ready to go again – what could be simpler?

Manual wheelchairs have been used for over 30 years and when introduced gave mobility to many people who would be otherwise housebound. The main problem was if a carer had to push a wheelchair it was very tiring and hard work, so at the end of a day out they would be exhausted. The next solution was to bolt on a battery pack to help the carer but it was part solution to the problem only.

The WeGo is based on a powered base that is steered by the carer allowing the power to take care of the strain, it offers more comfort in a padded seat than a standard wheelchair sling fabric seat. The WeGo really comes into its own when its time to transport it in the car. It dismantles into easy manageable parts for loading into the car and battery pack can be charged off-board so you can leave the WeGo in the car boot ready for your next trip.

AEM TIPS

- Always purchase Safe and reliable equipment with a written water tight guarantee which includes callouts, collections and deliveries, parts and labour.
- Make sure you deal with a company which is professionally insured to carry out sales, hire and repairs.
- Be sure they have their own workshop and engineers on the premises.
